

# TOWER RIGGING

Spectrum Telecom is a full service provider for Tower planning, site acquisition, installation, inspection, repairs, rigging and dismantling.

We have all the resources for hands on management, quality assurance and technical skills to manage your job to completion.

## We offer:

- Consultation
- Microwave Path Analysis
- System Design for deploying voice, video and data applications over Wireless IP Networks
- Tower Erection & Dismantling
- Tower Inspection & Repairs
- Rigging Services
- Tower Lighting installation, repair and re-lamping
- Tower Project Management Services
- Tower rentals
- We sell towers, antennas and related equipment.

Our team of IHSA certified riggers have been servicing federal, provincial and corporate accounts in Ontario since 2001. From system design, sale of the towers and on site erection, Spectrum Telecom delivers an added value with its end-to-end project management capabilities.

Our tower rigging team possess specialized skills and have a comprehensive understanding of the communication industry's RF requirements and functionality. This knowledge ensures completing the project to perfection with proper antenna placement, orientation and alignment, power and lightening protection, cable terminations and grounding. We take great pride in employing only the best riggers and technicians in our industry.

If you require more additional information and would like to consult with us on your next project, please contact Jason Bionda, Vice President, [jbionda@spectrumtelecom.ca](mailto:jbionda@spectrumtelecom.ca)
